

# ATC 100

## Hybrid Polymer Sealant

ATC 100 is excellent for sealing the cove joint of basement floors and walls. It can be used on concrete floor cracks, foundation gaps and any construction joint. ATC 100 adheres to damp and dry surfaces.

ATC 100 is a vapor impermeable sealant. It blocks transmission of radon, methane, water vapor and other soil gasses. The air quality of the home is improved by blocking harmful soil gasses and moisture penetration. ATC 100 sticks to wood, concrete, masonry, plastic and metal.

### Benefits

- Grey color
- Vapor impermeable
- Sticks to most surfaces
- Use on damp areas
- Blocks moisture and radon gas
- Paintable

### Uses

- Cove joints
- Foundation cracks and gaps
- Construction joints
- Indoor or outdoor exposure

### Advantages

- Remains flexible
- No VOCs
- Solvent free
- Eco-friendly
- UV resistant

Use in a standard caulk gun. Full cure in 3 days.
